

George R. Parsons

George R. Parsons is a Professor of Economics and Marine Policy at the University of Delaware. He earned his Ph.D. in economics from the University of Wisconsin in 1985. His fields of expertise are environmental and natural resource economics with a specialization in valuing environmental goods. He is best known for his work on travel cost random utility models, hedonic price models, and applications involving coastal resource use. He has published articles in leading journals in the field including the Journal of Environmental Economics and Management, Land Economics, the American Journal of Agricultural Economics, Water Resources Research, and Marine Resource Economics. He has served on the Board of Directors of the Association of Environmental and Resource Economists. He has been an Associate Editor for the Journal of Environmental Economics and Management and Marine Resource Economics. He has been awarded grants from US Environmental Protection, the National Oceanic and Atmospheric Administration, Delaware's Department of Natural Resources and Environmental Control, and the National Park Service. He has also served in numerous advisory roles and done many technical reviews for the same agencies.
