

Teresa Howard

Research associate at the University of Texas at Austin Center for Space Research. She serves as the Liaison Coordinator for the Mid-America Geospatial Information Center at CSR. In this capacity she is responsible for the coordination of product development and distribution for federal, state, regional and local governmental agencies, and for outreach to entities desiring to enhance their remote sensing capabilities. She is an active participant in State GIS coordination activities through the Texas Geographic Information Council and the TGIC Technical Advisory Committee, for which she has served as Chair. Ms. Howard obtained her Masters degree in Applied Geography from Texas State University-San Marcos (formerly Southwest Texas State University). In a former life, she worked on a professional fishing boat and researched traditional fishing practices in the southeastern Aegean Sea.
