

Chandler C. Morse
Environmental Policy Analyst
Environmental Area
Federal Regulatory Department
Advocacy Group

Chandler C. Morse joined NAHB in 2003. Chandler serves as a Policy Analyst within NAHB's Federal Regulatory Group. In this capacity Chandler is active in the Association's regulatory efforts focusing mainly on environmental statutes concerning water quality, wetlands, and transportation. Chandler is responsible for monitoring federal and states environmental statutes, regulations, and policies concerning wetlands and the TMDL program. In addition to these environmental issues, Chandler is involved with issues linking transportation and air quality, including National Ambient Air Quality Standards and transportation conformity.

Prior to joining NAHB, Chandler worked as an environmental consultant for a nationally recognized engineering and environmental services consulting firm. As a project manager with the firm, Chandler assisted private and municipal clients with watershed management and planning projects. The consulting projects in which he was involved built on the work Chandler performed in completing his intensive Masters research investigating the relationship between urban land use and stream condition in Maine.

Chandler has a Bachelor of Science in Environmental Policy and Resource Management from the Ohio State University and a Master of Science in Ecology and Environmental Science from the University of Maine.
